DETAILED ACTION

1. This action is in response to applicant's remarks received on 02/28/05.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Sheldon (6108914).

Sheldon discloses the invention including a central generally cylindrical hub 66, a circular flange 72, a trimmer line exit opening (74, 76, 78 and 80), a line end termination aperture/means (96 and 98) and line guide means (the interior surface of the openings).

4. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Kitz et al.

Kitz discloses the invention including a central generally cylindrical hub 12, a circular flange 32, a trimmer line exit opening 82, a line end termination aperture (96 and 98) and line guide means (46b-c).

Allowable Subject Matter

5. Claims 5-7 and 17 are allowed.

Response to Arguments

6. Applicant's arguments have been fully considered but they are not persuasive. Applicant argues that Sheldon does not show "a line end termination aperture on the top surface of the circular flange of the head". However, Sheldon teaches a line end termination aperture (96 and 98) on the top surface 70 of the circular flange 72 of the head (see Fig. 6). Also, Applicant argues that Kitz does not show "guide between the line trimmer opening and the opening on the top surface of the flange" and "a line end termination aperture on the top surface of the flange". However, Kitz teaches guide between the line trimmer opening (46b-c) and the opening (96 and 98) on the top surface of the flange (see Fig. 4-6) and a line end termination aperture (member 96 and 98 which are on top of the surface by member 90) on the top surface of the flange.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 3724

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
